 **Acquisition** 

The acquisition sections helps buyers keep track of their current deals. The buyer may also upload photos when they are on site. This section is full of useful cold calling features.

 **Inventory** 

Keep track of items simply.

 **Repairs**

Register instruments for repair. Batch numbers can be used to filter cost of repairs, or show repairs that match your criteria.

 **Shipping**

The use of customized modules, allows you to setup an inventory item for shipment simply, without logging into a shipping platform. Simply provide the metrics requested, check the box on the left of the item(s) to ship, select "More", and choose your preferred shiper.

 **Expenses** 

Expenses is a simplified way to store your business expenses and receipts for tax purposes, with easy export to TurboTax or Quicken via 'Filter' and 'Save CSV'. Simply input the information into the desired fields, take a photo of the receipt, and it is saved in the database.
